

HB 909 -- Transportation Development Districts

Sponsor: Pfautsch

This bill specifies that the State Auditor may audit each transportation development district (TDD) not more than once every three years and limits the cost of the audit that the TDD must pay to not more than 3% of the gross receipts received by the district. Currently, the State Auditor must audit each TDD at least once every three years and may audit more frequently if the auditor deems appropriate with the costs of the audit paid by the district.
